Abstract

© 2015, Mediterranean Center of Social and Educational Research. All rights reserved. Importance of the problem is defined by a solid size of shadow component of the economy both nationally and globally, suggesting that an in-depth study of the basic principles, framework and content of informal economic activity in our country, taking into account the current trends to combat it worldwide and to bear in mind its impact when it comes to building a stable state of strategic management model with respect to business entities. In order to understand the grounds of communication between formal and informal sectors occurs the need to conduct a thorough study of the phenomenon of illegal economy in the current transition of the market, its importance in reproductive economic processes and elements of its functioning. This paper is aimed to show the essence of the shadow economy and to know the consequences of activity in the shade.
